-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This Office Action is responsive to the applicant's amendment filed on June 6, 2005

Claim 1 has been amended. Claims 12 and 14 have been canceled. Thus, claims 1-11, 13 and 15 are pending in this application.

Applicant's cooperation in correcting the informalities in the drawing and specification are appreciated.

Response to Amendment

The amendments and arguments presented by the applicant have been duly noted. The previous indication of allowability of claims 1-11, 13 and 15 are hereby withdrawn; therefore, the finality of that action is withdrawn. An updated search and further review of the prior art of record has prompted the new rejection.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Morley et al. (Morley) (Patent Number 3,205,024).

Regarding claims 1-6, as shown in Fig. 1, Morley discloses a frangible coupling having a first ring (16); a second ring (22); and a plurality of ligaments (20), the first ring and second ring being interconnected by the plurality of ligaments with the load magnification member (25) provided in the first ring, there being a small clearance (26) maintained between the member (25)

Art Unit: 3748

and ligaments (20) adjacent to; the ligaments (20) being substantially axially aligned, the first and second rings (16, 22) being cylindrical, the ligaments (20) being equidistantly spaced apart, the first ring and the second ring being coaxial, and the first ring and the second ring being concentric.

All functional implication and the statement of intended use have been fully considered. However, they are deemed not to impose any structural limitations distinguishable over the Marley device, which is certainly capable of performing as a frangible coupling if so desired. In other words, the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

Allowable Subject Matter

Claims 7-11, 13 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Communication

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Theresa Trieu whose telephone number is 571-272-4868.
